## Native Plants of Northwest Arkansas

---

Native plants have grown in popularity over the years due to their climate tolerance, pest resistance, and ability to be self-sustaining. We specialize in keeping hardy native plants in stock.

“A native plant is one that occurs naturally in a particular region, ecosystem, or habitat without direct or indirect human intervention” ~ United States National Arboretum

These Arkansas native plants are usually in stock at White River Nursery. Call or come by for current availability. We are happy to help you locate hard to find plants.

### Vines

Campsis radicans- Trumpet Creeper  
Celastrus scandens- American Bittersweet
